# Introduction

We take great pleasure to introduce ourselves as the pioneers in the arena of IT solutions and services. Our initiatives and efforts take recognition under the name of Evos Solutions Pvt. Ltd.

Evos Solutions is an Orissa (India) based venture providing a wide spectrum of unique Information Technology solutions, consultancy and services to a clientele of premier organisations in the government and private sectors at International level. It's where each project is considered a challenge and is taken up with full commitment and perseverance. At Evos Solutions, each and every individual plays an unparalleled role in making of the final product or imparting the desired services. From website designing and Internet solutions to software development and business consultancy, Evos Solutions offers a wide spectrum of services to suit specific needs and requirements.

Our's is a team of energetic, dynamic, laborious and the best technically competent brains each one trained in his own specific field; be it designing, software development, animation or web hosting.

# Infrastructure

## **Hardware Infrastructure:**

- 1000 Sq Feet of Office Space
- 10+ full blown workstations for software development, testing & support facilities.

## **Internet Connectivity:**

- We have a dedicated broadband cable link for all our development facility

## **Dedicated Servers for application Hosting, Testing and Client presentation:**

- For websites and application hosting, testing, client presentation and for sensitive data storage, we have co-location servers.

## **Accessibility and Security:**

- Different types of physical and access restrictions have been imposed within the development centers so that our clients can be absolutely certain that their data, systems and processes and other confidential information, including IPRs (Intellectual Property Rights) do not get circulated, inadvertently or on purpose.

# Working Model

- Evos Solutions software development services cover the complete project life cycle, from requirement assessment and task definition, to solution development, to implementation and integration, followed by support and maintenance.
- We believe that our ability to integrate software with existing systems by expanding information systems infrastructure is an important advantage of Evos Solutions as a turnkey solution provider.
- The Organization is well aware of the processes and the critical success factors of what it takes to successfully work with offshore software development model from India.
- We have learnt with experience and understood to manage the Cultural Differences, Time Zones, Language Barriers, extensive use of Internet for communication, the right attitude, legal Issues related to signing of contracts and other nitty gritty attached to it.
- Innovative resource network enables clients to execute projects round the clock, in a timely yet cost-effective manner, achieving exceptional quality levels.
- We have developed a robust methodology that allows us to get projects off the floor swiftly and then proceed on a predictable, low risk path for high quality results. This methodology employs our rich portfolio of reusable components and our development model to offer cost and time benefits to our customers.
- While working for few of the companies we have experienced exceptional results that have allowed our clients to bring down costs up to 60% thereby maintaining a world class standard in terms of delivery and quality.

# Projects Undertaken

Since its incorporation, Evos Solutions has an enviable record of successfully building IT solutions for massive and complex infrastructure and market projects.

Take, for instance, just two of the many major projects undertaken by us:

## Project for Educational Institutions

- An Institute Management System is a fully automated and integrated web enabled total workflow management system designed specifically to address the unique needs of educational institutes.
- It seamlessly integrates and simplifies the management of the various complex and time consuming activities including application processing, admissions, fees payment processing, course management (course allocation, time-table management, attendance, examinations, grading etc), HR planning, payroll management, inventory management, financial planning...etc.
- It enables institutions to manage resources, build the community, access information easily.
- The solution helps the Institute in delivering and maintaining proper education to the students. The students can self-service by using the system without much help from others.

## Project for Hospitals

- A Hospital Management System is a Web solution specifically designed for Hospitals.
- This web-based portal is a solution, which could be easily customized as it is completely dynamic in nature and has key modules like Reservations Module, Customer Loyalty Module, Content Management Module, Alert Messaging etc.
